One system for your sales, stock, customers and website, with AI that answers on WhatsApp

ERP, CRM, a bilingual website and an AI assistant, set up on Odoo and run by one consultant you deal with directly. Pick the package that fits today. Everything carries forward when you grow.

Book a free 30-minute call | See the packages

RECOMMENDED PACKAGE

USD 2,000

about EGP 111,600, all-in

TYPICAL AGENCY PRICE

~~EGP 150k+~~

for the same scope in Egypt

SUPPORT INCLUDED

3 months

fixes, small changes, monitoring

LICENSE FEES

USD 0

Odoo Community, no per-user cost

One place for the whole business

Sales, stock, invoices and customers in one system instead of Excel and WhatsApp threads.

Automation that cuts costs

Reminders, follow-ups, reorders and reports run on their own, so your team does less admin.

AI that speaks like your customers

Answers in Egyptian Arabic, English and Franco, day and night.

Yours from day one

Your server, your domain, your data. You get every admin password.

Packages

Fixed prices for the scope written below. Start small and upgrade later: you only pay the difference, and nothing is rebuilt.

For unique processes

Custom

from USD 6,500

about EGP 362,700 · one-time

- Everything in Business, plus:
- ERP and CRM built around your exact workflow, on Odoo or as a custom web app
- AI trained on your own documents, plus invoice and receipt reading
- Integrations and automations across your other tools: shipping, payments, marketplaces
- Custom-designed website
- Full source code in your own GitHub account
- 3 months of support

Best for: getting sales and customers organised first.

Choose Starter

stock and cash (USD 200)

- **Bonus:** 2 extra support months vs. paying monthly (USD 200)
- **Bonus:** first-year domain paid by me (USD 15) and 1 extra custom report (USD 85)

Best for: running the whole business on one system, with AI doing the repetitive replies.

Choose Business

Best for: processes no standard system handles, or plans to sell the software.

Discuss Custom

You pay for what works

You pay the second milestone only once the system works the way we agreed in writing. If something in the agreed scope isn't right, I fix it before you pay.

Automations that cut your costs

These run on their own once the system is live. For a small team they typically give back 20–30 staff hours a month and speed up how fast customers pay. Hours are estimates and depend on your volume.

Automation	What it replaces	Est. hours saved / month
Unpaid-invoice reminders by email and WhatsApp	Chasing customers by phone	4–6
Lead assignment and follow-up reminders	Leads forgotten in notebooks and chats	3–5
AI replies to common customer questions	Answering the same questions all day	6–10
Order confirmations and delivery updates on WhatsApp	"Where is my order?" calls	3–4
Low-stock alerts and draft purchase orders	Manual stock counts and missed reorders	2–3
Weekly sales, stock and cash report to the owner	Building reports in Excel	2–3
Total		**20–31**

What the same work costs elsewhere in Egypt

The Business package costs less than Egyptian Odoo partners charge for the ERP alone, and it adds the CRM, website, AI and support. You save because you work directly with the consultant who builds your system, with no sales team or office overhead in the price.

Option	What you get	Typical price
Business package	**ERP, CRM, website, AI assistant, launch, 3 months support, bonuses**	**EGP 111,600**
Odoo partner, starter package	ERP only, 2–3 modules, setup and training	EGP 125,000–250,000
Odoo partner, growth package	5–8 modules, custom workflows, integrations	EGP 250,000–600,000
Small-company website on its own	5–10 pages	about EGP 20,000

Published Egyptian prices, checked November 2026. EGP figures use 55.8 EGP per USD.

How we work

1. Discover

A free call and a workshop to map how your business runs. You get a one-page written scope.

2. Build

Your system is set up on a test link and your data is imported.

3. Test and train

Your team tries everything. I fix what comes up and train each role.

4. Launch and support

Go live, then support on WhatsApp.

Recent work

The same building blocks, ERP, e-commerce, AI and analytics, already running for businesses in Egypt and Saudi Arabia.

ariika

WhatsApp · AI · E-commerce

Ariika Egypt: AI customer service on WhatsApp

An AI assistant for a furniture and home-decor store. It answers in Egyptian Arabic, English and Franco, searches 1,300+ products, and sends order updates on WhatsApp.

ariika.com

ariika

Odoo 17 · Analytics · Google Ads

Ariika Saudi Arabia: Odoo, warehouse and analytics

A custom Odoo module that sends orders to the Flow fulfilment warehouse and brings stock and delivery status back automatically. Plus Google Analytics and Google Ads tracking, so the store sees which ads pay off.

ÖKO

Shopify · Custom theme

OKO: online store

A Shopify store with a customised theme, the full product catalogue imported, and product photos prepared for the web.

Radwan El Ogail

Website

Radwan El Ogail: business website

A business website designed, built and launched.

Odoo · Shopify · WhatsApp Business · Google Analytics · Google Ads · GitHub

Questions

Why is this cheaper than an Odoo agency?

Agencies pay for sales teams, offices and account managers. You work directly with the consultant who builds your system. The scope is fixed and written down before work starts.

What if we outgrow it?

Who owns the data and the system?

What happens after the support period?

Does it work in Arabic?

Payment

Milestone	Share	Business (USD)
Kick-off	40%	800
System working as agreed	40%	800
Launch	20%	400

Same split for every package. Pay in USD or in EGP at the rate on the invoice date.

Monthly running costs

Item	Per month
Cloud server	USD 12–24
Odoo license (Community)	USD 0
AI usage	USD 2–10
WhatsApp Business provider (Business package)	from USD 19

Paid directly to the providers, in your company's name.

Scope and limits

- Up to 15 users, 1 company, 1 warehouse, 1 currency (EGP)
- Odoo Community with standard workflows. Egyptian e-invoicing (ETA), payroll and full accounting are quoted separately
- Data import: customers, products and opening stock, up to 5,000 rows, from our Excel template, imported once
- Website: up to the package's page count, you provide text and images, 2 rounds of revisions
- 3 printed layouts (quotation, invoice, delivery note) and up to 5 dashboard tiles
- AI assistant answers from your approved content (up to 20 pages) and hands complex questions to your staff
- WhatsApp needs Meta business verification and a dedicated number; Meta's approval is outside my control
- You own and pay for the server, domain, Meta and AI accounts, and I get admin access to set them up
- Support: up to 6 hours a month for fixes and changes under 1 hour each, replies within 1 business day
- Anything beyond these limits (new modules, integrations, extra warehouses or companies) is quoted as an add-on before work starts

Who you'll work with

Shady Al-Halawani

ERP Expert · Odoo Consultant · AI Engineer · Cairo

- Sets up and integrates Odoo for businesses in Egypt and Saudi Arabia: sales, inventory, warehouses, custom modules
- Builds production AI: assistants that answer customers in Arabic and English, AI search over company documents, WhatsApp automation
- Builds e-commerce stores, websites and analytics tracking
- MSc Computer Science, Distinction, University of Roehampton, London
